

OUR ENERGY-EFFICIENT TECHNOLOGY HELPS GETTING THE DGNB QUALITY SEAL.

Energy efficient air conditioning for shops – The Decathlon sports superstore in Essingen, Germany, has been awarded with the silver signet of the German Sustainable Building Council (DGNB).

The installation of the VRF-R2 heat pump system with heat recovery strongly contributed to the DGNB certificate.

Units paced within the central system pre-condition the air with Mr. Slim Series heat pumps. Shoppers at this Decathlon branch are very comfortable whatever the weather outside.
